PROFESSIONAL SUMMARY

Full-stack developer and Software Engineering student (expected graduation 2027) with professional experience on production systems built with .NET 9, Vue 3, MySQL, and Azure. At Ópticas DRmax, I worked on an optical retail chain's management system and its migration from a monolith to 7 microservices. Experienced with Clean Architecture, CQRS, multitenancy, RBAC, and CI/CD.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Java, Python, PHP, HTML, CSS

Backend: .NET 9 / 8, ASP.NET Core Web API & MVC, Entity Framework Core, RESTful APIs, JWT, AutoMapper, xUnit

Frontend: Vue 3, React, Vite, Pinia, PrimeVue, Tailwind CSS, Razor Views

Databases: MySQL, SQL Server, stored procedures, idempotent SQL scripts

Architecture: Microservices, Clean Architecture, CQRS, strangler fig pattern, multitenancy, RBAC, N-layer, Repository

DevOps & Tools: Azure (App Service, Static Web Apps, MySQL), GitHub Actions, Docker Compose, YARP, Git, Azure DevOps, Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Ópticas DRmax

Jul 2026 – Oct 2026

.NET 9, C#, EF Core, Vue 3, TypeScript, MySQL, Azure, GitHub Actions, Docker, YARP | Costa Rica

- Helped migrate an optical retail chain's management system from a .NET 9 monolith to **7 microservices** using the strangler fig pattern, working on both production systems.
- Implemented **multitenancy** (empresa_id + EF Core global query filters) in the Tickets, Patients, and Sales services, backed by tenant-isolation tests.
- Migrated the Auth and HR services to the **standardized RBAC permission scheme**, with startup validation that catches uncataloged permissions.
- Built the **customer service (SAC) module** from scratch: Kanban case inbox, case timeline, file attachments, hierarchical catalogs, and role-based permissions.
- In the monolith, delivered the **clinical records** module, a **reports module** with Excel export, and **lab order auditing** end to end.
- Integrated **SAP Business One** into billing (taxes, catalogs, inventory) and built a **referral program** with a coupon engine, public landing page, and CRM dashboard.
- Parallelized batch lab order generation **to prevent request timeouts** and fixed production bugs involving time zones and character encoding.

ACADEMIC PROJECTS

JarasTech — Technology Sales System

C#, .NET 4.8 WinForms, SQL Server, RESTful APIs, BCCR Exchange Rate API | N-layer Architecture

- Designed a 5-module desktop system (products, stock, billing, digital signature, users) with a Factory/DAL/BLL architecture and integrated the Costa Rican Central Bank (BCCR) API for real-time exchange rates.
- Modeled a 20-table SQL Server schema with stored procedures, PDF invoicing (QuestPDF), and logging (log4net).

Urban Flame — Restaurant Ordering Web Application

ASP.NET Core MVC (.NET 8), C#, Entity Framework Core, AutoMapper, SQL Server | N-layer Architecture

- Implemented full CRUD for the Combo entity across all 4 layers, using AutoMapper and the repository/service pattern to make the module independently testable.

E-desk — Support Ticket Management System

React, Vite, MySQL, RESTful APIs

- Built a full-stack app with a React/Vite frontend and a MySQL-backed REST API for creating, tracking, and resolving support tickets.

EDUCATION

Bachelor of Software Engineering — Universidad Técnica Nacional (UTN), Costa Rica

2023 – Expected 2027

Technical Degree in Networks — CTP Francisco J. Orlich, Costa Rica

2020 – 2022

CERTIFICATIONS

Cisco Networking Academy: JavaScript Essentials 2 (2026) • HTML Essentials (2025) • JavaScript Essentials 1 (2025) • Data Analytics Essentials (2024) • Python Essentials 1 (2023)

Languages: Spanish (native) • English (intermediate B1, actively improving)
